

The 10-year Recertification Training & Testing will be available starting on January 1, 2023

Available to all medical examiners who have been certified for at least 9 years

Past or Currently Due Recertification

Regardless of 2023 expiration date, **all MEs will have a full year to complete the required recertification training and pass the certification test.**

This will not impact their ability to perform physical qualification examinations and use the National Registry system.

Those who do not complete the training and certification test by December 31, 2023, will be removed from the National Registry.

The table below explains how much extra time you will receive to complete the training and testing based on the month in which your National Registry certification expires.

Certification Expires	Extra Time to Complete Training & Testing
January 2023	12 months
February 2023	11 months
March 2023	10 months
April 2023	9 months
May 2023	8 months
June 2023	7 months
July 2023	6 months
August 2023	5 months
September 2023	4 months
October 2023	3 months
November 2023	2 months
December 2023	1 month

FMCSA encourages MEs to take full advantage of the extended 1-year timeframe by starting training and testing actions on January 1, 2023.

Take the following steps to complete these requirements:

1. Complete either live or online training provided by TeamCME (or another organization)
3. Log into your National Registry account and upload your training certificate
4. Contact one of the 2 FMCSA-approved testing organizations (Prometric or PSI) to schedule the certification test
5. Take and pass the certification test prior to your National Registry certification expiration
